

WE MAKE ENERGY EFFICIENCY EASY

Not sure where to save energy in your business?
Ask yourself:

- Is the lighting in your facility dim or uneven?
- Do your lights take too long to warm up?
- Has it been awhile since your heating/cooling system was serviced?

If you answered “yes” to any of these questions, call us. Rocky Mountain Power’s Wattsmart® Business program offers expertise and incentives to save your business time, energy and money.

A GUIDE TO *saving energy* FOR COMMERCIAL SPACES

WATTSMART®

BUSINESS

**ROCKY MOUNTAIN
POWER.**

REDUCE YOUR ENERGY COSTS. INCREASE YOUR PROFIT.

Profit is the key to a successful commercial or retail business and every dollar saved improves your bottom line.

Rocky Mountain Power's Wattsmart® Business incentives make energy efficiency easy by reducing the cost of upgrades and improvements. Your business will benefit from improved productivity and lower operating costs year over year.

Start by:

- Upgrading interior and exterior lighting systems.
- Installing advanced rooftop controls.
- Incorporating lighting and occupancy controls.

Reach out to your participating contractor to get started.

DIAL IN CUSTOMER COMFORT

Heating and cooling account for up to 45% of monthly energy costs. Advanced rooftop controls welcome guests by decreasing drafts, noises and temperature swings, while extending HVAC equipment life and decreasing energy use by 15%-60%. By improving comfort, HVAC controls please customers and help keep your business busy with sales. Call to upgrade your customers' experience today.

ILLUMINATE YOUR WAY TO SAVINGS

Do you want to brighten moods and refresh spaces? Switching to high-efficiency LEDs and lighting controls reduce the energy used to light a facility by 30%-50%. LEDs offer a pleasing glow to improve the appearance and security of displays, products and services.

Consider that:

- LEDs use at least 25%-50% less energy than fluorescent lights.
- LEDs last 35-50 times longer than fluorescent lights.
- Fixture-level lighting and/or occupancy controls add 20%-50% more energy savings and allow you to customize lighting for each space.

Contact the Wattsmart® Business program team before you start, as pre-purchase approval is required for lighting projects.
