Keep Your
HVAC Units
Humming!

Have your HVAC system restored to its optimal condition.

Many HVAC systems are not operating at peak efficiency. Proper HVAC maintenance can:

- **Increase system efficiency**
- **Cut energy consumption**
- **Save you money**

Schedule an HVAC assessment with Rocky Mountain Power!

Lower Your Bills – Get Product Incentives!

Rocky Mountain Power is committed to keeping your business energy costs as low as possible. Our Wattsmart incentives will help offset the cost of HVAC system improvements, including: maintenance agreements, economizer repairs, refrigerant charges and upgraded thermostat installation.

Sample Medium Sized Project: Six - 10 ton rooftop units	Wattsmart Incentive	Total Incentive	Energy Cost Savings/year	Estimated Cost Before Incentive
Maintenance Agreement	\$75/rooftop units	\$450	\$98.91	\$4,200
Economizer Repairs	\$150/rooftop units	\$600	\$94.20	\$1,260
Advanced Rooftop Controls	\$2,000/rooftop units	\$12,000	\$1,674	\$21,750
Refrigerant Repair	\$35/ton cooling	\$700	\$195.85	\$1,215
		\$13,750	\$2,062.96	\$28,425

Benefits of a Check-Up

Regular maintenance can catch small issues before they escalate into costly repairs. A regular check-up can:

- Enhance comfort and safety for occupants
- Reduce future maintenance and repair costs
- Save money on energy bills
- Extend the lifespan of your HVAC system

Simple Fixes = An Efficient System

There are some simple steps that can be taken to improve the performance of your HVAC system and help your business save money and energy. Have you noticed:

- **Poor comfort and air quality?**
- **Your system running at odd times of the day?**
- **Hot or cold areas?**

Many of these issues are a result of easily fixed problems, such as: broken or improperly set up economizers, improperly programmed controls, or dirty/clogged air filters.

A check-up can help identify the best, most cost-effective improvements for your system.

To verify if your contractor is approved, please contact Rocky Mountain Power at 800-222-4335

What a Check-Up Includes

1. An approved contractor will examine how your equipment operates, including the electrical connections, air filters, and thermostat calibrations to ensure your current system is optimized.
2. After this assessment, you will receive an energy report and a no-obligation quote for recommended upgrades, maintenance opportunities, and available incentives.
3. When you choose to make improvements, your contractor will discuss your incentive opportunities and help you save!
